

STEEL TANK PAINTING: COMMERCIAL AND INDUSTRIAL TANKS

PREFERRED SERVICES

- Tank Coating Specialists
- Interior/Exterior Painting
- Tank Cleaning & Disinfecting
- Lasting Durability
- Sand Blasting
- Pressure Washing
- Floor Grouting
- Industry Leading Systems
- Industry Standard Compliant
- High Performance

Preferred is your expert at steel tank painting. Because the exterior of steel tanks are highly vulnerable to corrosion, the structural integrity can be compromised and shorten the life of the tank – we can correct existing corrosion issues beneath the protective coating.

To ensure the extended life of your tank, contact the Preferred coating experts regarding the treatments we use and our tank cleaning and painting process.
